## PROFILE

### **Developer/Account Executive/Tech Savvy/Program Developer**

Accomplished Senior Account Executive with over a decade of sales and service excellence making transition to Software and Web Development. Recognized and rewarded by past organizations for being a quick study, driving revenue growth, increasing brand loyalty and injecting a personable and team spirit to the organization. Humble and consultative style collaborates effectively with teams to ensure the best delivery outcomes.

### Recent Projects

**React API Demo** - Languages: HTML, CSS, JavaScript, JSX, JSON, React. A React-based web application that makes an API call using fetch and dynamically renders elements.

**React List App** - Languages: HTML, CSS, JavaScript, React. A straightforward application that takes user input and renders cards, allowing users to manipulate their state.

**Boring Political App** - Languages: HTML, CSS, JavaScript, jQuery, Firebase, Bootstrap. A multi-page website that makes a series of api calls based on geolocation and user input to render relevant information.

**Donation App** - HTML, CSS, React, Node.js, Express.js, Mongoose, MongoDB, Material Design. A group project. This is a fully functional website built as a template for nonprofits to use. It incorporates responsive layouts, easily customizable react components, and an integrated payment system for taking donations.
